Jotron company profile

Enhancing safety since 1967

JOTRON
Performance for Life

"We believe safe journeys begin with trusted partnerships. By taking a long-term perspective in everything we do, we create lasting value for our customers, people, and society."

Rune Kristiansen, CEO

Safe Journey!

Jotron is a privately owned company based in Larvik, Norway. We have a team of 420 employees spread across offices in Oslo, Tønsberg, Amsterdam, Newcastle, Houston, and Singapore. Additionally, we operate a production facility in Kaunas.

We are dedicated to developing and manufacturing professional products and communication systems for use in air, on land and at sea. For us, **Safe Journey** is more than just a marketing tagline – it is our mission and responsibility. It serves as a reminder that what we do plays a vital role in safety systems worldwide. Aiming for excellence in everything we do, Jotron is certified in accordance with ISO 9001, 14001, 27001 and 45001.

Innovation from the outset

Founded in 1967, Jotron has consistently delivered lasting product value to the industry and our customers. The company spent three years developing the world's first Emergency Position Indicating Radio Beacon (EPIRB), which was launched in 1970. While we have successfully ventured into new markets, we remain focused on developing industry-leading products by leveraging the most advanced technologies.

Customer focused

Through dedicated service, consistent performance, and high-quality products, Jotron has built numerous enduring customer relationships.

Our team consists of supportive, solution-driven technologists and developers who are committed to collaboration.

We partner with quality-focused organizations that share our belief that the best solutions emerge from open and transparent communication.

Most importantly, we prioritize our customers above all else!

Managing the entire product chain

Jotron is recognized globally as a leading provider of high-performance safety communication equipment. Our products are trusted worldwide, and we are continuously expanding into new and dynamic markets. What sets us apart in the industry is our complete control over the entire product chain - from initial concept, development and production to market delivery.

Our robust and well-established product portfolio offers critical communication solutions designed to perform reliably, even in the most challenging environments:

- VHF and UHF radios for air traffic control, coastal and offshore communication
- Voice Communication System (VCS)
- Ricochet synchronized recorder and replay system for air traffic control, vessel traffic service, coastal and offshore communications
- Emergency Position Indicating Radio Beacon (EPIRB) and Voyage Data Recorder (VDR)
- Search and Rescue Transponder (SARTs)
- VHF handheld radio
- Automatic Identification Systems (AIS) Class A
- Personal Locator Beacon (PLB)
- Tracker (fishing buoy tracker)
- Echo sounder and speed log for maritime navigation
- Portable Pilot Unit (PPU) for marine pilots

Jotron MEP
Jotron MEP is based in the Netherlands. The company has been part of Jotron since 2025, and develops and supplies Voice Communication System for critical maritime and aviation applications.

AD Navigation
The acquisition of leading portable navigation system supplier AD Navigation in 2025 established Jotron as a market leader in Portable Pilot Units (PPU) for maritime pilots. AD Navigation's PPU is considered the most accurate PPU sensor on the market. (adnavigation.com)

Meeting market requirements
Research and development are essential to creating successful products and solutions that meet the demands of the international market. Jotron has a team of dedicated, experienced, and highly qualified engineers, and we invest more than 10% of our annual revenue in research and development.

Driven by sustainability
At Jotron, we recognize the pivotal role businesses play in creating a positive impact on the world. Our commitment to environmental, social, and governance (ESG) principles is deeply embedded in our corporate DNA.

Upholding the highest standards in information and cybersecurity
Jotron is certified according to the ISO/IEC 27001:2023 standard for information security management systems. We are dedicated to safeguarding information and are actively involved in ensuring its protection.

Committed to safety in aviation
At Jotron, ensuring the safety of air traffic systems is paramount. Our unwavering commitment to this goal guarantees that our systems and products consistently deliver optimal performance. Developed in compliance with leading organizations such as ICAO, EASA, FAA, and EUROCAE, our solutions provide a trusted level of effectiveness.

Trusted worldwide
With a global footprint, we have had the privilege of serving clients from all corners of the world, including some of the largest airlines, air navigation service providers, defense organizations, and maritime partners strategically located across the globe.
